# WHAT MAKES A GREAT CHAIR?

With Salamander Seating, there's so much more than meets the eye. Our chairs are made with the finest materials, using innovative-yet-proven construction techniques. Love-at-firstsight style is wrapped with comfort, durability and value.

#### **CONSIDER THE FRAMING**

Salamander Seating frames are constructed of top-grade plywood that flexes and recovers without cracking. Joints are crafted with mortise-and-tenon construction for greater **strength** and durability. No shortcuts. No Compromises. Just strength and durability you can count on.

#### RELAX...IT'S BUILT TO LAST

Our suspension system provides comfort & long-lasting support, combining traditional springs & modern elastic webbing with the highest quality resident virgin polyurethane foam. Cushions are cut to shape, then wrapped with layers of memory foam and polyester padding before covering. This type of construction prevents cushions from packing down and losing their shape over time, promising many years of durability, comfort and good looks.
