Active Cooling - Bottom Vent

Our Active Cooling System, designed to prevent heat buildup inside Wall Mounted cabinets, employs a remote thermostat and maintenance-free fans. When the thermostat is placed atop a component, fans provide precise cooling. The system replaces a standard cabinet bottom vent.

Finish: Black

Fans: (4) 80 mm

Air flow: 38 CFM

Noise level: 18 dBA

Airflow direction: Intake

Power consumption: 2.2 W max

Thermistor: Remote with 20" lead

Operation: Begins at approx 80° F; max speed reached at approx 95° F

Under cabinet clearance required: 2.5" from cabinet bottom to floor of obstruction. Designed to work well in all wall hanging cabinets mounted at a minimum of 2.5" off floor surface.

Utilization with floor standing cabinets requires optional feet or custom installation of the unit to provide ample clearance.

Minimum clearance required above units is 1/2".
