

FOR IMMEDIATE RELEASE

Salamander Designs Introduces Two New Home Theater Seating Styles

(Bloomfield, CT) August 26th, 2016 – Salamander Designs, Ltd., a leader in premium quality residential and commercial audio/video furniture solutions made in the USA for over 20 years, has announced the introduction of their Luca and Lilliana home theater seating solutions. Both models feature distinctive design and unique stitch patterns reminiscent of the finest luxury automobiles while offering the most sumptuous, durable and ultimately comfortable vantage point for enjoying home cinema.

All Salamander home theater seating models are constructed with an emphasis on premium quality, style and support. Each collection has been ergonomically engineered to ensure optimized positioning for lumbar, head/neck and legs over the course of a long feature film. At Salamander, all entertainment seating models are constructed to deliver lasting comfort and elegance.

Luca Theater Seating

The Luca seating features a stylish diamond double-needle stitching on the seat and back inserts with single-needle top stitch on the arms, the seat and back frames. Consumers can select stitching that matches or contrasts with the upholstery for a stunning look. Luca recliners are offered with manual or power recline mechanisms and with or without cup holders.

Lilliana Theater Seating

The Lilliana seating is a similar overall form factor to the Luca models, but is adorned with handsome horizontal channel stitching on the seat and back inserts and matching or contrasting welt around the perimeter. Like the Luca chairs, Lilliana models are offered with manual or power recline mechanisms and with or without cup holders.

Salamander Designs Luca and Lilliana seating models come with a limited lifetime warranty and will be available October, 2016.
