

FOR IMMEDIATE RELEASE

## Salamander Designs Creates New Product Category with Innovative Low Profile Wall Cabinets for Audio/Video Components

*At a mere 12-inches in depth, Salamander Low Profile Cabinets are the most sleek, elegant furniture solutions for integrating technology into any room or décor*

(Bloomfield, CT) August 23<sup>rd</sup>, 2016 – Salamander Designs, Ltd., a leader in premium quality residential and commercial audio/video furniture solutions made in the USA for over 20 years, has announced the introduction of Low Profile Wall Cabinets as part of their Chameleon collection. Measuring only 12-inches deep and available in an array of styles and configurations, these shallow depth additions to the Chameleon lineup make it easy to conceal A/V electronics and wiring in an elegant, low profile cabinet—achieving the discreet look that discerning consumers and interior designers demand.

Salamander floor-standing shallow depth cabinets are designed to be easily affixed to the rear wall for added safety and stability, particularly when using the optional integrated TV mount that ideally positions almost any size flat panel display without the need to drill into finished wall surfaces. Each cabinet is constructed on a lifetime warrantied extruded aluminum frame that enables easy customization for just about any application. The chassis is also future-proof, accepting retrofit-able accessories to accommodate the evolving needs of each user.

“Innovation has always been a hallmark of what we do here at Salamander Designs, and the Low Profile Wall Cabinets integrate audio/video technology into the home like no other furniture solution on the market,” explained Salamander founder and President Salvatore Carrabba. “Salamander has long been respected for addressing the evolving needs of the marketplace—and these shallow cabinets enable our dealers to elegantly install A/V systems within the smallest, most discreet footprint possible.”

The Low Profile Wall Cabinets are available in triple and quad-width sizes and can be configured to suit any need, such as an integrated center channel loudspeaker for visually unobtrusive home theater applications. Also optionally available are integrated 3U vertical racks to accommodate smaller rack-mountable components. Most critically, Salamander Low Profile Wall Cabinets provide A/V specialists with a sleek, premium solution that will help differentiate themselves in a highly competitive market. Salamander Low Profile Wall Cabinets will be available in October, 2016 with US MSRPs starting at \$2499.
