

Salamander Brings Most Innovative Premium A/V Furniture Solutions to ISE 2015

Salamander Designs to present at Integrated Systems Europe 2015 with Design-your-own, customizable A/V cabinets and theater seating products that are in a class by themselves. This will be Salamander's second year in a row at ISE, Europe's largest tradeshow for the professional AV and electronics industry.

Bloomfield, CT ([PRWEB](#)) January 02, 2015 -- Salamander Designs Ltd., a leader in innovative, premium quality audio/video furniture and theater/lounge seating solutions for more than two decades, will be exhibiting at the ISE ([Integrated Systems Europe](#)) trade show in Amsterdam, February 10-12, 2015. ISE is Europe's largest trade show for the professional AV and electronic systems industry, and the 2015 event is expected to draw more than 50,000 attendees and 1,000+ exhibitors.

"ISE is an extremely important event for us as we continue to expand our brand's footprint in the European market. This will be our second time on the ISE show floor, and we're excited to have another opportunity to meet EMEA dealers in person, and show them the Salamander difference...how our A/V furniture solutions are uniquely shaped by the needs of our customers and in a class by themselves," stated Salamander Designs President and Founder Sal Carrabba. Visit Salamander at ISE Booth 1-Q70, where they will be showcasing custom A/V cabinets from the Chameleon Collection, including Berlin, Miami and Barcelona styles, and luxurious entertainment seating from the flagship Talia Collection that feature new premium leathers.

Salamander's customizable, Design-Your-Own (DYO) lineup offers A/V integrators a vast array of cabinet configurations and unmatched flexibility to determine the perfect solutions for their customers. At the heart of each custom cabinet is an aluminum chassis engineered to provide a strong and flexible furniture platform. The finest real wood finishes and other materials are offered and built to exacting standards to achieve modern styles that are perfect for the European market. And the unique internal chassis permits a wide variety of bolt-on options and accessories that integrate with the latest technology and are sure to please the most demanding A/V enthusiast.

Salamander's theater seating philosophy recognizes that entertainment seating is one of the most critical elements for the modern media room. Every piece is constructed with the highest possible degree of strength, style and support. Seating collections, like Talia, are ergonomically engineered to ensure optimal comfort. Wall-away, quiet recliner mechanisms allow close-to-wall positioning. And with a wide variety of configurations and premium designer covering offerings, the perfect fit and solution is not only possible, but promised.

About Salamander Designs
