

Salamander Expands Chameleon Collection of Flagship A/V Furniture

Three corner cabinets and four extra-wide Quad cabinets provide the ultimate modular entertainment solutions for A/V integrators

Bloomfield, CT April 17th, 2012 — Salamander Designs, Ltd., a leader in premium quality audio/video entertainment furniture, home theater seating and accessories such as accent lighting and wall hanging systems has expanded its Chameleon Collection line of corner-style and extra-wide cabinets engineered to accommodate the most sophisticated A/V components and support today's larger TVs. Salamander's new products are in direct response to market feedback from their dealer network.

New Corner-style Cabinets: Three new Chameleon Collection corner-style cabinet configurations (available in 9-different cabinet styles) include a 20-inch high version, a 30-inch high version and a 30-inch high version with grillwork to accommodate a center channel speaker. These new models add attractive options to the many configurations currently available from Salamander. "No longer are users limited to ill-designed cabinets for smaller spaces," explained Salamander president Sal Carrabba. "Our corner-style cabinets will support a flat panel TV on top while integrating the A/V electronics neatly inside," Carrabba added. "We feel confident that the Salamander brand comprehensively addresses the needs of dealers and custom integrators with the addition of these new products." **Artwork** [HERE](#)

New Quad-style cabinets: Salamander's 4-door units, called Quads, are designed to accommodate today's large flat panel TVs, both visually and structurally. New product offerings in this category include contemporary and transitional styles. "More consumers are buying larger flat panel TVs, so expanding the Quad line was simply a natural response to that market trend." Carrabba stated. The newest extra-wide Quads are also capable of housing a center channel loudspeaker, cementing Salamander's position as the most complete supplier of audio/video cabinetry. **Artwork** [HERE](#)

Salamander A/V cabinets are available in a vast array of styles, materials and configurations to satisfy any living environment. Salamander A/V cabinets are built to last, using premium grade materials and construction techniques. All Salamander cabinets are engineered to provide for proper acoustics, vibration reduction, ventilation, remote-friendly doors and access for cable management, creating the ultimate A/V furniture solution. Our advanced manufacturing and assembly methods allow a finished cabinet to be delivered within a few days from order, eliminating the long wait typically associated with competitive products in the custom furniture category. All Salamander custom cabinets are assembled in the USA.

About Salamander Designs

Salamander Designs, Ltd. is a leading manufacturer and marketer of furniture for the Consumer Electronics and Audio/Visual markets. Its versatile, advanced product lines feature a high level of configurability and customization that allow consumers to define specific product configurations to meet their needs. Salamander's A/V furniture lines include the Chameleon Collection, with a wide array of styles and configurations, the Archetype System—a unique open shelving system, the modular Synergy System that enables consumers to create an almost limitless number of possible product configurations, and a handsome Home Theater Seating line that can be similarly customized with a variety of materials, styling options and accessories. Salamander also makes a wide variety of accessory products such as accent lighting, cabinet wall mounting systems, pull-out media drawers, cabinet footings and mounting systems for flat-panel displays. In short, Salamander can accommodate almost any design preference and A/V requirement. www.salamanderdesigns.com
