

mounting. The subwoofer enclosure is available in all 9 styles and complements other imaginative **new accessories** like a wall-mounting kit that creates the illusion a cabinet is floating above the floor. The addition of the subwoofer enclosure offers consumers even more options than before. Instead of “one-size-fits-all,” Salamander helps everyone get A/V furniture that meets their exact needs.

The subwoofer enclosure is an external box designed to house an audio system’s external subwoofer. The enclosure matches its companion A/V cabinet in style, size and finish, and incorporates large rear grills to avoid interfering with rear or side-firing subs. Like all other Chameleon products the subwoofer enclosure can be assembled and

shipped from the factory within three days. Everyone gets customization without the usual long wait for the goods. The subwoofer cabinet addition demonstrates Salamander Designs' continuing commitment to innovation, and how it is employed to benefit consumers, dealers and custom installers.

The Chameleon Collection offers 19 configurations, including rack mounting and the subwoofer in each of 9 decorator styles. Add choices of bases, furniture feet and accessories, and there is truly something for everyone.

Chameleon entertainment cabinets combine craft and technology in uniquely sophisticated designs that respond to customers' needs and tastes. Exceptional attention to detail, reliability and durability are represented in these cabinets that are constructed of premium, made-in-the-USA components. Practical features include extruded aluminum frameworks that keep high-tech accessories hidden but handy, solid wood doors with soft-closing dampers, infinitely adjustable shelves, ventilation louvers in the bottoms of cabinet segments, and removable rear panels for fast, easy access to component jacks.

About Salamander Designs

Salamander Designs, Ltd. is a leading designer and marketer of furniture for the Consumer Electronics and Audio/Visual markets. Its versatile, advanced product lines feature an extraordinarily high level of configurability and customization that allow consumers to define specific product configurations to meet their needs. In addition to the **Chameleon Collection**, Salamander's A/V furniture lines include the **Archetype System**, a very flexible shelving system, and the **Synergy System** a fully modular cabinet system that allows consumers to create a virtually limitless number of possible product configurations. Its handsome **Home Theater Seating** can be similarly customized with a variety of materials, styling options and accessories, and its **Mounting Systems** for flat-panel displays make them easier than ever to integrate with A/V furniture or independently mount onto a wall or ceiling. In fact, Salamander can accommodate almost any design preference and A/V requirement.

Salamander Designs is based at 811 Blue Hills Avenue, Bloomfield CT 06002. For further information, visit its website at www.salamanderdesigns.com
